Proven Path to Natural Health

DIABETES... GROWING EPIDEMIC

Thirty-four million Americans are walking around with diabetes, and 400,000 people will die this year due to related complications. Diabetes sets up conditions for heart disease, stroke, blindness, kidney failure, leg and foot amputations, pregnancy complications, and deaths related to flu and pneumonia. At risk, are the 5.9 million Americans who are unaware that they have the condition.

We spend \$200 Billion a year on diabetes, directly and indirectly. In 1997, the average health care cost for a person with diabetes was \$10,071, compared with \$2,699 for a person without diabetes.

U.S. adults with diabetes increased 49% from 1990 to 2000 and continue the pace. Increases are expected in the next decade and beyond. Source: CDC
